Albanian hackers attack Serbian church web site

KosovoCompromise Staff

Albanian hackers have attacked the web site of the Diocese of Raska and Prizren of the Serbian Orthodox Church and defaced it with slogans glorifying Islam, Greater Albania and murder of Serbs.

Hackers identified themselves as the “KOsova Hackers Group”.

“This is one more proof that the self-proclaimed independence of Kosovo is the fruit of the Islamic fundamentalism and Albanian aspirations to create a Greater Albania or United Albanian States, as the hackers that attacked the site termed it,” says spokesman for the Diocese.
